Juche Idea Illuminates the Road to Independence

On behalf of the Juche Idea Study Group of Denmark, which has been founded this year with great encouragement of this event, I want to thank our Finnish hosts for making all this possible bringing progressive people from all over the Nordic countries together in the spirit of friendship and solidarity with the commitment to the Juche Idea. I also want to express our gratitude to our friends from KASS in DRPK present here today, that has travelled far to teach and inspire us about the victorious Juche Idea. We look forward to welcome you in Copenhagen next week.

Today availing myself of this opportunity, I have the pleasure to talk about the Juche idea that illuminates the road to European and global independence in the most scientific way.

Over the recent years we've seen various political happenings with the people expressing their will of sovereignty, independence and freedom. This has happened in referendums as Brexit, in Catalonia, in national referendums on EU matters, presidential elections – not just in Europe but in all over the world. However the implementation of the will of the people has lacked the scientific and ideological foundation needed to be a revolutionary success. Instead false politicians and capitalist power has tried to split the people instead of gathering the revolutionary masses which would be a threat to end the establishment. This shows a huge revolutionary potential.

This is why we must study and be inspired by the ideas and methods of the Juche ideology.

Kim Jong Il, the great leader of the Korean people said.

“The Juche idea, the man-centred outlook on the world, is a noble idea of loving the people as well as an idea of true love for the country and nation; it is a great revolutionary idea of our times which illuminates the road of advancing the cause of world independence forcefully.”

The Juche idea provides us with scientific answers to such important problems as the essence of an independent world and its main ideal, the law-governed process, the subject and object of global independence, and the principle and stand to be maintained in realizing global independence.

Having the correct understanding of the Juche idea that illuminates the road to global independence is of important significance in realizing independence of Europe, as one part of the world.

Great Leader Kim Jong Il continues:

“To apply the creative method to solve all problems arising in the revolution and construction in conformity with the actual conditions by relying in the creativity of the people – this is the principle one should always strictly adhere to in the revolutionary movement”

This tells us that if the right to independence of all countries and nations are not properly provided, then disturbances are made endlessly in building free and peaceful Europe due

to high-handedness, arbitrariness and interference in internal affairs. Present situation urgently demands the scientific idea that enables all the countries and nations in Europe to smash high-handedness and arbitrariness, aggression and infringement of sovereignty by the imperialist reactionary forces and struggle for freedom and peace.

In order to build free and peaceful new Europe without aggression and war, all of us here must clearly understand that the Juche idea clarifies the most scientific road for independence of Europe and follow the road indicated by the Juche idea. However the way is difficult we will keep on going because we know that the way will end up with happiness and victory.

Through our experiences we witnessed that the Juche idea played a tremendous role in encouraging and stimulating the struggle of the people in Europe and other regions of the world who want to live in a free, peaceful world without aggression and war. The correct road for independence in Europe is to apply the Juche idea that illuminates the road of realizing independence in Europe and the world in a scientific manner.

The Juche idea says that each country and nation should maintain independence under the banner of anti-imperialism and independence and realize genuine international justice irrespective of differences in political view, religious belief and economic and cultural development level in order to realize global independence in Europe and the world. The Juche idea also says that it should strengthen and develop the world peace movement and other anti-imperialist and independent forces and keep high vigilance against imperialists' maneuverers of division. The Juche idea also says that the parties, organizations and progressive countries who champion independence should support and cooperate to conduct common struggle.

The Juche idea is, indeed, the great ideology of our time that illuminates the scientific road of building an independent new world free from domination and subordination, aggression and war. Today applying the Juche idea is suited for Europe's interests to achieve peace and prosperity in the region.

To implement the principles and fundamentals of the Juche Idea in Europe and in the Nordic countries will not be easy. In comparison the Korean People's high mentality and noble ideological traits tell the vitality of the ideological work that has be done. In DPRK the people are united behind the leader in singlemindedness, forming society as a family as a whole, and work full of conviction, devotion and optimism.

This is far from the case in Europe, as in most of the world.

What, after all, does Danish, Swedish or Nordic mean anymore? Denmark, and other Nordic countries, was once self-defined as nations with moral purpose: countries that would wage war and revolt against slavery and tyranny, that would seek to spread free thinking and democracy when so many rivals powers did the reverse. That sense of national purpose waned during the years of the cold war and when the countries joined the European Union and came to think of themselves as just another European country. We must regain that self-belief to determine our own destiny as nations.

This tells us one of the most important points in the Juche Idea giving to us by Dear Leader Kim Il Sung. He expressed that it must always be done in one’s own way. In his always clever words he expressed it:

“Koreans take their food with spoons whereas Westerners take theirs with fork and knife”.

This tells us that the Juche Idea must be implemented with the understanding of the current situation, the history, the culture and the economic development of a nation.

Great Comrade Kim Jong Il applied to this and told us:

“One must always proceed from the actual situation and creatively solve all problems in conformity with it”

This is why we must create our own path and use the tactics suited for Europe – which cannot be compared with the same as in the DPRK for Juche to prevail.

We, the Juche Idea Study Group of Denmark argue that we must let us inspire by the road of the Juche Idea in the technical sense of resuming our sovereignty. Being inspired by the creative methods of the Juche Idea the Nordic countries will be free to define a global vocation again, with great inspiration from the independent position of DPRK today as a free country in the world.

We, the Juche Idea Study Group of Denmark welcome this event with our warmest greetings and look forward to study and work hard with Mallima speed to spread the Juche Idea in the name of peace and prosperity.

We wish for good health to the Supreme Leader of the Korean Workers Party, the state and the army of DPR Korea Marshal Kim Jong Un, the great sun of the 21st century:

Long live the international friendship and solidarity

Long live the eternal victorious Juche Idea

Long live the DPRK.

Kam sa ham ni da.

Morten Dam,

Chairman of the Juche Idea Study Group of Denmark
